

Roadway Safety

FRANKFORD AVE ROADWAY SAFETY PROJECT

SOLUTION

This project will include the addition of a multi-use path along Frankford Avenue from 23rd Street to State 390. This project will tie into the sidewalk currently being constructed along Frankford Avenue south of 23rd Street and will provide connectivity to the bike and pedestrian features that will be added to State 390 with its widening.

PROBLEM

This heavily traveled corridor is significantly deteriorated and is in need of pedestrian and bike paths.
