

Roadway Safety

CITY-WIDE SIDEWALKS

SOLUTION

This project would add 7.5 miles of sidewalks in the city limits, specifically on parts of: West 26th St, Tennessee Ave, East 26th St, Minnesota Ave, Maine Ave, West 14th St, West 5th St, East 8th St, Illinois Ave and East 39th St.

Benefits of this project would encourage and enable non-motorized transportation, connect neighborhoods and other amenities, reduce traffic and carbon footprint, and support healthy lifestyles and sense of community.

PROBLEM

The City of Lynn Haven recently had a "Roadway Pavement Rehabilitation Evaluation" completed. This study identified deficiencies in the current mobility plan. Specifically it identified 7.5 miles of proposed sidewalks along collector roadways that would greatly enhance the pedestrian safety in Lynn Haven.
